

ENGINEERING SERVICES FOR OPERATIONAL SUCCESS

Minopex’s Engineering capability comprises a full array of engineering services to drive operational success. Minopex also offers engineering workshops, Ensera and Ensermo, which aim to provide clients with in-house fabrication and erection, breakdown supports and repairs, as well as other services geared to support ongoing operations.

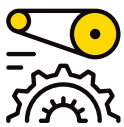

ENGINEERING SOLUTIONS

Our unrivalled experience in processing plant operations, commissioning and maintenance, for a client-base across Southern Africa, has earned Minopex an unmatched track record of providing cutting-edge solutions to any engineering project.

Our engineering services include:

- Concept to commissioning projects
- Fabrication and erection
- Structural integrity solutions
- Fitting and machining
- HDPE pipe components
- Motor rewinding facilities
- CNC plasma cutting

PROJECT ENGINEERING

Big or small, our engineering team is equally committed to each project from the initial planning stage to repairs, upgrades and even complete replacement.

As a client, you can rest assured that the same level of enthusiasm and passion for excellence will be dedicated to any size project with the highest level of quality and safety.

Our services include:

- Mobile Field Services
- On-off Site Fabrication
- Erection
- On-site Pump Refurbishment
- Workshop Repairs
- Lifting and Rigging
