

QUICK FACTS

20

Million LSL spent on training in the last 6 years

98,5%

Local employees (70% local onsite operational Management)

31

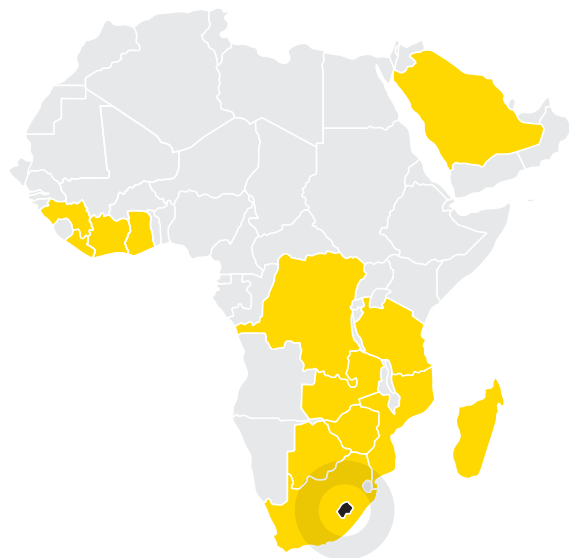

Artisans graduated from the Minopex artisan learnership programme since 2006 (4 completing in 2019 alone)

47

Local companies loaded on the Minopex Vendor list as at 2020 with a 31% combined local spend

EXPERIENCE

In Lesotho Minopex currently operates, maintains and is responsible for the quality control of the largest Diamond producer – Letšeng Diamonds. Between 2008 and 2020 Minopex was responsible for the recovery of an average of 9 +100cts stones through the Letšeng plants and in 2020 alone was responsible for the recovery of 15 +100cts stones through the Letšeng plants.

COMMODITIES

Minopex provides fit for purpose operations and maintenance practices with enough depth to cater for various commodities. The organisation’s extensive experience across base metals, precious metals & stones and bulk commodities brings new projects into production in the shortest possible time with an experienced workforce and established policies and procedures. Thus resulting in a shortened ramp up period between commissioning and full production.

BASE METALS

- / Copper
- / Cobalt
- / Magnesium
- / Uranium
- / Zinc
- / Nickel
- / Aluminium

PRECIOUS METALS & STONES

- / Gold
- / Palladium
- / Silver
- / Platinum
- / Diamonds

BULK COMMODITIES

- / Bauxite
- / Iron ore
- / Coal

**MINOPEX LESOTHO
TIMELINE**

- 2003**
Minopex Lesotho incorporated in the Kingdom of Lesotho in November 2003
- 2004**
Started Operating at Letšeng Diamonds & have been Operating on site ever since
- 2009**
Started Operating at KAO, Pilot Plant
- 2010**
KAO Mine Plant Constructed from 2010 to 2011
- 2011**
Started Operating at Lihobong until October 2013
- 2012**
Operated KAO Mine for Storm Mountain Diamonds from 2012 to 2013
- 2015**
Mothae, operated from 2010 to 2015, Pilot Plant
- 2020**
Operations at Letšeng Diamonds continues

OPERATIONS & MAINTENANCE DIFFERENTIATORS

For over two decades Minopex has developed an impressive track record having operated more than 46 sites and commissioned over 62 sites, across the base metals, precious metals & stones and bulk commodity sectors. Today, the organisation is widely recognised as the leading processing plant contract operator in Africa employing over 2 000 staff, across 16 sites. Collectively Minopex plants treat on average 6,7t of Ore per month.

EXPERIENCED WORKFORCE

01

- / Leading team of minerals processing O&M experts
- / We can find, train and deploy skills quickly
- / Optimisation focus – we can bring technical expertise to solve your issues
- / Large pool of DRA technical skills to call on

COST OPTIMISATION

02

- / Efficiencies in staffing levels and labour management
- / Procurement and supply chain savings – we leverage our scale in buying better for you
- / Overhead cost optimisation (sharing of support functions across contracts)

INTEGRATED SYSTEMS

03

- / Best practice management processes – The Minopex Way™
- / Integrated systems architecture (including MOMS proprietary MIS system)
- / Ongoing investment in leading technology and digitisation
- / Integrated SHEQ systems

INNOVATIVE RISK MANAGEMENT

04

- / Sound contract governance and oversight
- / Dedicated commissioning and problem-solving teams (operational readiness and SWAT)
- / Ability to take risk and reward with you (innovative contracting models)

PROVEN TRACK RECORD

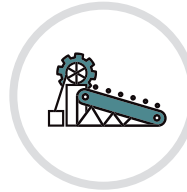

05

- / 23 years experience
- / EMEA footprint – 46 plants operated and commissioned
- / Multi-commodity track record

CAPABILITIES

The Minopex capability covers a wide range of value adding services for clients who outsource operations as well as those who prefer to self-operate. We operate, maintain, engineer, advise and optimise mineral processing plants on behalf of our clients.

OPERATE

Minopex deploys a trained and experienced workforce together with integrated systems and controls, to deliver operations services to our clients thereby reducing overall project risk. Minopex operates process plants, mines and analytical laboratories.

MAINTAIN

At the heart of the Minopex reputation for excellence lies highly qualified and expertly trained maintenance teams focused on asset management and plant reliability. Services include maintenance contracts & management systems as well as shut-down maintenance services.

ENGINEER

The Organisation's capabilities expand a full array of engineering services including shut-down, fabrication and refurbishment work on mineral processing facilities.

ADVISE

The Advisory team provides Operational Consulting services by assisting clients who self-operate to improve asset performances in mines and process plants. Services include operational readiness, value engineering and expert advisory services for plant optimisation.

OPTIMISE

As companies look for new innovative ways in which to reduce operating and maintenance costs while enhancing productivity, Minopex provides various solutions to maximise production performance, including integrated systems, training & development, commissioning and ramp up services, supply chain management and MOMS, our information management system.
